(54) Title: USING CONFIGURATION IDENTIFIERS FOR COMMUNICATING CONFIGURATION DESCRIPTIONS

(57) Abstract: The present invention relates to a method, for a first communication device, of maintaining an up-to-date configuration description of a second communication device, said first device comprises a storage medium and is adapted for storing on said storage medium configuration descriptions being uniquely identified by a configuration identifier, the method comprises the steps of:- receiving from the second device information comprising a configuration identifier uniquely identifying the configuration of the second device,- checking whether the configuration description identified by the received configuration identifier is already stored on the storage medium,- if said configuration description is already stored on the storage medium, setting the configuration description corresponding to the received configuration identifier as the active configuration description of the second device,- if said configuration description identified by

the configuration identifier is not stored on the storage medium, requesting and receiving the configuration description from said second device, storing said configuration description together with said configuration identifier on said storage medium and setting the configuration corresponding to the received configuration identifier as the active configuration description of the second device. The invention minimizes network load and can especially be advantageously used in UPnP networks.

INTERNATIONAL SEARCH REPORT

PCT/IB 03/05014

A. CLASSIFICATION OF SUBJECT MATTER
IPC 7 H04L29/06

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 H04L

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ, INSPEC

* Special categories of cited documents:

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

T later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

X document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

Y document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
